➤ **Important Changes to the Bachelor of Health Science for 2018**

Monash Medicine, Nursing and Health Sciences has introduced some changes to the Bachelor of Health Science, taking effect in 2018. Instead of choosing a specialisation, students now enrol straight into the degree of their choice.

Bachelor of Health Sciences

Students build a sound foundation in health care and learn to identify, investigate, analyse and assess health issues. They will have the flexibility to explore different areas of health and customise their degree to suit their interests.

Bachelor of Public Health

This course gives students the opportunity to pursue their passion for promoting good health, preventing disease, and managing illnesses. They will be taught by passionate teachers with a global orientation, getting them ready to make a difference and address real health challenges for communities and populations.

Bachelor of Radiation Sciences

This course is ideal for students interested in becoming a radiation therapist. Throughout the program students will be immersed in the latest technology, participate in 3D treatment simulations and complete clinical placements from second year. Taught by experienced radiation therapists, students are kept up-to-date with the latest industry developments. The Bachelor of Radiation Sciences is a great pathway into the Master of Radiation Therapy at Monash.

Bachelor of Paramedicine

This course prepares students to be ready to save lives and qualify as a paramedic. Students gain hands-on paramedic experience with placements from Semester 1, while working in clinical and community settings and learning from experienced paramedic educators. Graduates work with emergency health services across Australia and overseas.

Nutritionists and Dietitians

According to the Dietitian Association of Australia (DAA) - [Dietitian Association of Australia \(DAA\)](#), there is a distinction made between dietitians and other occupations in the nutrition and food science field, including that of nutritionist. The key difference between a dietitian and a nutritionist is that, in addition to or as part of their qualification in human nutrition, a dietitian has undertaken a course of study that included substantial theory and supervised and assessed professional practice in clinical nutrition, medical nutrition therapy and food service management. **So, in Australia, all dietitians are nutritionists however nutritionists without a dietetics qualification cannot take on the expert role of a dietitian.**

Victorian universities offering undergraduate courses in nutrition, food science and/or dietetics include:
